

Ensuring iBIS Security at your Agency

Providing the highest level of protection for your agency through proper access to iBIS is of the utmost importance to all of us within eBusiness at Patriot Insurance. To do so most efficiently and effectively though, we need your help as well.

First, usernames and passwords to access iBIS should never be shared. Each user of iBIS should be assigned his or her own unique username and password. If your agency staff is not sharing passwords then no further action is needed on your part.
