

Patriot Insurance Launches Newly Designed Website

Patriot Insurance is pleased to announce the release of its newly developed website!

Our address remains the same (www-patriotinsuranceco-com.devfmins.wpengine.com), but our site look has completely been overhauled to appeal to both current policyholders and first-time visitors, as well as showcase our Northeastern roots. This comes also with a newly adopted theme line, “We stand true to our word.”

From increasing the number of places where visitors can click to find an agent and providing additional links where policyholders can conveniently make an online payment to sharing information about our company and how prospective agents can partner with us, our new website is more user-friendly than ever.

Below are just a few of the many goals we anticipate to achieve with the enhancements made — all to improve the ease in which both Agency Partners and policyholders are able to do business with us:

- Increase referrals to agents
- Nurture existing customer relationships
- Build new and strengthen existing agent relationships
- Provide opportunities to job seekers

Please note that the secure pages within iBIS and agency services will remain the same for Agency Partners, and your normal log-in experience has not been affected.

A “pop-up” message will be in place for about three months to alert new visitors that the site has been redesigned. It should be visible just one time (dependent on the user’s cookie settings).

We encourage you to visit our new website and take a look around. We’ll think you’ll like it – we stand true to our word.
